* Irrigated Water Cost:

Prior Reappraisal irrigation values include all reported water cost information.

New Reappraisal irrigation values include a base cost of \$10.00 per acre, an allowable labor cost but no energy cost allowance.

As part of the map mailing process that begins on 12/11/2008, energy cost information will be supplied by producers resulting in a lower total value for irrigated land.

* Irrigated Productivity Issue:

The availability of irrigated water impacts productivity. Productivity adjustments will be made to acknowledge the actual application of water. This will also reduce the value associated with irrigated land. Estimates of impacts will be available during the upcoming Legislative Session.

* Irrigated Water Cost:

Prior Reappraisal irrigation values include all reported water cost information.

New Reappraisal irrigation values include a base cost of \$10.00 per acre, an allowable labor cost but no energy cost allowance.

As part of the map mailing process that begins on 12/1/2008, energy cost information will be supplied by producers resulting in a lower total value for irrigated land.

* Irrigated Productivity Issue:

The availability of irrigated water impacts productivity. Productivity adjustments will be made to acknowledge the actual application of water. This will also reduce the value associated with irrigated land.

Estimates of impacts will be available during the upcoming Legislative Session.

TABLE D - 3
